Who we are:-

"Madhu" established in 1976 has been passionately involved in providing solutions to the electronics fraternity. Mr. Vasant Shah who completed his Engineering in E & TC, was the first batch in those days (1973) from COEP, Pune is the founder of "Madhu". The legacy continues with the second generation also in the business through its young & dynamic CEO Mr. Rusabh Shah – M.S.(USA), B.E.(Mumbai) to further add more value towards offering better solutions to the OEM's through continuous innovation & latest cutting edge technology.

A family run business now with its directors and investors from the Electronics background believes in providing solutions to the Electronic Manufacturing industry by providing technical support and providing the components at affordable pricing with closed to kitting solutions which remains the forte of the company. Our strength lies in our Team at Madhu who create that flavour of passion for their work and this passion is what transcends into rendering excellent services to our most valuable asset i.e. our customers. The Product range includes 90% solutions for the PCB or Control Panel industry with solutions in the range of Active, Passive & Electro-Mechanical components from the world's most reputed manufacturers who are willing to support our end users for providing complete hand holding from Designing, Prototyping, Pilot runs to Full Fledged Production.

39 years of Componenting the Electronics industry

MADHU' s Vision:-

We believe that India is one of finest countries in the world which has been gifted with great Engineers and especially the electronics design capabilities that we possess, is indeed the world's best. We believe that if the right support can be rendered to these engineers with the right technology and right pricing there is nothing on this planet that we cannot do, reaching mars was one such classic example, where in spite of all the odds we still made it the first time at the costs which were mind boggling to the rest of the world. We see ourselves at the epitome of giving such solutions to the electronics industry where we help our Indian engineers focus on the most important element of error free design for the world market by giving them right components to their disposal. "Madhu" in this journey of the next revolution sees itself as an integral part and envisages that its team and the work rendered by them will take the industry to the next level.

39 years into servicing this industry has given "Madhu" a respectful spot in the Electronics Domain which the company believes will further Elevate when our customers will grow with us to form the New Tomorrow which is a world of electronics that is "Made in India" which has quality, reliability, durability and most important i.e. environment friendly.

We remain committed for the future ...

Why you should work with Madhu

Madhu believes and takes the environment seriously hence we recommend our customers with the most efficient products that do not affect the environment and are providing solutions towards renewable energies like the wind & solar. We believe that our contribution towards protecting the environment can go a long way if the right technologies are introduced to our customers. We also believe that people's safety is of prime importance & hence the new products that we are introducing is promoting this belief and it is our constant endeavour to make our Indian railways, renewable energies, metros and all those areas where a human is involved to be taken as the highest priority.

We believe that by doing the most basic elements in the right way, will change our Lives & our Generations for the Better Tomorrow ...

Industrial Electronic Components, Connectors, Instruments & Allied Products
Your Source for Genuine Electronic Components

Since 1976

Special Non-Commodity Components which are usually sourced from Catalogue companies have a problem that they are:

- High price (100 to 400% more than normal).
- * Less Flexible.
- * Zero Credit Policy even after regular business.
- * No Consolidation option.
- * High Attrition of employees leading to establishing again with a new person sometimes even every quarter.
- Late Decision Making for larger Quantities,
- * some times even takes weeks after approval from Top management.

We can service you at excellent speeds with the above problems:

- * **Fast Quotation**
- * **Prompt Deliveries with commitment**
- * **100% Genuinity Guranteed**
