

PTC HEATING ELEMENT MANUFACTURERS

What We Do?

At Chhaperia PTC Products LLP, we specialize in designing, developing, and manufacturing advanced Positive Temperature Coefficient (PTC) heaters. Our products ensure efficient, reliable, and safe heating solutions tailored for various applications, including hair straighteners, air conditioners, electric vehicles, and mosquito repellents. With cutting-edge PTC ceramic technology, we provide self-regulating heating elements that enhance energy efficiency and safety, meeting the demands of modern industries.

Who We Are?

A subsidiary of Chhaperia Electro Components, founded in 1994, Chhaperia PTC Products LLP brings over 30 years of expertise in the heating element industry. Our ISO9001:2015 certification underlines our commitment to quality and innovation. We focus on delivering world-class heating solutions backed by an experienced R&D team dedicated to continuous improvement and customization.

Our Services

- **PTC Heating Expertise:** Specializing in Positive Temperature Coefficient (PTC) ceramic heaters, we deliver advanced heating solutions that ensure safety, reliability, and energy efficiency.
- **Application-Specific Customization:** We provide tailor-made PTC heaters for diverse applications such as hair straighteners, electric vehicles, air conditioners, and mosquito repellents. Each heater is designed to meet the unique demands of the application.
- **Self-Regulating Technology:** Our PTC heaters leverage self-regulating properties to maintain consistent temperatures, ensuring optimal performance and enhanced safety without requiring external controls.
- **Energy-Efficient Solutions:** PTC technology inherently limits power consumption, making our heaters eco-friendly while reducing operational costs.
- **Comprehensive Support:** From prototyping and design consultation to manufacturing and quality assurance, we offer complete support to meet our clients' needs.
