

LPS BOSSARD PRIVATE LIMITED

How we add value

“PROVEN PRODUCTIVITY” IS OUR CONTRIBUTION TO BOOSTING THE COMPETITIVENESS OF OUR CUSTOMERS – SUSTAINABLY AND MEASURABLY.

OUR COMPANY AT A GLANCE

We are an Indo-Swiss joint venture company that was founded in November 1997, and our Indian corporate headquarters is situated at Rohtak, Haryana.

Since our establishment in 1998, we have been at the forefront of Industrial Assembly Technology, charting a pioneering path in the industry. Throughout the years, our unwavering commitment and profound knowledge have propelled our remarkable progress and expansion. As a result, our services now extend to customers nationwide, with a substantial sales milestone of over INR 313 Crore, a testament to our steady and impressive growth trajectory.

We have a range of more than 200,000 articles in Stainless steel, High tensile steel, MS, Brass, Copper, Aluminium, Titanium Alloy, Inconel, and Plastics. Our range includes standard items (as per DIN, ISO, JIS, NFE, ANSI/ASME and other National & International Standards) and Multifunctional fasteners like, Self-drilling screws, Thread cutting, Thread Forming screws, Ecosyn®-fix, Ecosyn®-plast, Ecosyn®-lubric, Ecosyn®-drill, Ecosyn®-SEF, PT & Delta-PT screws and many more. Apart from these, we also develop and supply items as per customer specifications.

We have joined hands with many renowned companies like Panduit, STANLEY®, PEM®, NORD-LOCK®, J.Lanfranco, Sentinel, Essentra, Clufix® and many more. We have multi-tier branded solutions to fulfil the application needs of our customers from various industry segments. Our major product solutions are categorized as Wire management, Self-clinching, Riveting, Anti-loosening, Access hardware, Tamper-proof fasteners, Threaded inserts, Hydraulic/Pneumatic fittings, Shaft-retaining, and Transportation protection.

OUR AIM

We aim at providing the latest in Fastening Technology and C-parts management to our customers.

In our main operational activity, Fastening Technology, we are headquartered in Rohtak, Haryana and have formed regional offices at New Delhi, Bangalore & Pune. In an effort, to be closer to our customers, we also have offices in Vadodara, Chennai, Hyderabad, Haridwar etc.

ACCREDITED WORLDWIDE

We have been rated as best supplier by many of our customers, and this is the biggest certificate we have, and will always achieve.

“We deliver what we promise”

OUR VISION

We want to be “THE TRUSTED EXPERT BRAND” providing assembly technology solutions for our customers globally.

Our Current business policy is in line with our principals, based on an overall medium term entrepreneurial vision. We see ourselves as an international logistics-oriented group for Fastening Technology and C-parts management. We have access to worldwide procurement and engineering know-how.

The top priority in planning company development is given to strengthening established activities and developing new markets. This includes assuring an appropriate level of growth in order to remain competitive, as well as making targeted acquisitions. The latter, for example might be projects in the C-part management sector, which are also of considerable interest to our fastening technology customers.

Furthermore, our vision includes clear views on flexibility, as well as transparency with regards to value added, both of which we consider as important as our market targets.

OUR QUALITY POLICY

LPS BOSSARD
Proven Productivity

“We at LPS Bossard will provide reliable quality products economically on time to the total customer satisfaction.”

In order to meet above policy we have clear objectives: “to increase confidence of customer by providing quality products on time” and “to reduce cost of customers product by providing technical and logistics support”

“We are a leading OEM supplier offering global solutions for local requirements.”

GUIDING PRINCIPLES

Our Guiding Principles reflect the behaviors and practices of our employees, creating a strong and positive work environment.

WE COLLABORATE:

Bossard believes that the equation $1+1 = 3$ may very well be correct. Because together, we achieve more. That is why we want to work together even more closely and intensify the collaboration and exchange of knowledge between all regions, functions, and hierarchies.

WE COLLABORATE

WE DELIVER VALUE:

Our primary objective is to create added value for our stakeholders. We must not lose sight of that. That is why we always want to keep in mind the purpose of an activity – regardless of whether it is a product innovation or an internal meeting.

WE DELIVER VALUE

WE EMPOWER:

Bossard is convinced that all employees are willing and able to contribute to the company's success. For this reason, leaders are encouraged to delegate tasks. Trust in our employees and their motivation is strengthened when leaders primarily communicate why we do things and not how.

WE EMPOWER

GUIDING PRINCIPLES

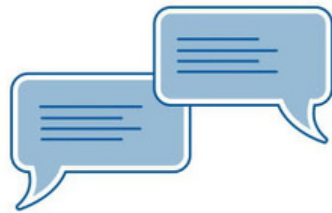

WE EXPERIMENT:

WE EXPERIMENT

All too often, ideas are stifled before they even have a chance to succeed. We want to be open to unconventional ideas, because new things are created when we simply try things out. If we end up rejecting an idea after all, then we will certainly have learned something. And that, at the very least, is just as valuable.

WE TALK REAL

WE TALK REAL:

Sometimes we think that addressing problems is a sign of weakness – yet in that we are completely wrong. To combat this mindset, we want to conduct open conversations, listen to each other, and value feedback. Only with this approach can everyone continue to develop and learn from each other.

THE YARDSTICK FOR OUR ACTIVITIES

“Engineering and logistics lead to a cost saving of 30 percent and more”

We have developed a three-fold approach to adding customer value. This allows industrial enterprises to exploit rationalization potential in fastening technology, both within and outside their companies. Along the entire procurement and value added chain, whole cost pools can be turned into a competitive advantage. Customer benefit is our yardstick.

CORE COMPETENCIES

● Product Solutions

We are at home in the market for fastening elements worldwide and know how and where to manufacture and develop such elements.

● Assembly Technology Expert

We are familiar with customer-specific problems in fastening technology and know how to solve them.

● Smart Factory Logistics

We are accustomed to customer-specific supply requirements and have the necessary systems and solutions in place.

● Smart Factory Assembly

We optimizes production, reduces costs, and enhances quality through advanced automation and data-driven insights, benefiting customers' operations.

IN-HOUSE MANUFACTURING

LPS Bossard Private Limited stands out in precision manufacturing with an impressive array of In-house machines. The facility boasts 28 Sliding Head Machines, 1 Turn Mill Center, and many more in the pipeline.

The machining processes, incorporating Sliding Head and Turn Mill Centre technologies, are complemented by capabilities in rolling/threading, grinding (centerless, super finishing, honing), stamping, tapping, and cleaning.

Machine capabilities range $\varnothing 2$ to $\varnothing 38$ mm. Secondary operations like ID grinding and super finishing ensure exceptional surface quality. The testing arsenal includes CMM, Roughness Tester, Spectro, and more.

LPS Bossard works with diverse raw materials, from low carbon steel to specialized alloys, meeting customer specifications with precision and expertise.

17025 CERTIFIED TESTING CENTER

- Complete set up as per ISO 898 for testing of fasteners.
- Hardness Tester
- Micro Vickers
- Fishers Scope Coating Thickness Tester
- Salt Spray Chamber
- UTM, range from 10 to 200 Tn
- Impact Testing

- DPPM < 300 Average
- Capability to filter zero defect.
- Over 1 Billion pcs pass through our quality systems.
- DOL at ~ 500 Customers

- Coordinate Measuring Machine - CMM
- Spectrometer
- Millipore Test
- MPI
- Ultrasonic Testing
- Torque Tension Test
- Roughness Tester
- Roundness Tester

PRODUCT & SERVICE PACKAGE

“Your Cost saving potential lies with us”

BASIC PRODUCT

As our basic product, we offer a variety of fasteners to the diversified needs of market. Providing reliable, quality products on time is our main or basic service. Functional products must be available in sufficient number and at an acceptable price. To this end, we maintain a worldwide manufacturing, development and procurement network with several linked warehouse locations.

It's product documentation, available in catalogue form, comprises 200,000 items. 98 percent are always available from stock.

PRODUCT SUPPORT

In fastening technology, there is more to fully exploiting the rationalization potential than global product availability. That is why we offer product support to help our customers manufacture a better product and to lower production costs. This engineering service can improve the product by identifying the most suitable materials, enhancing the quality of the fastening or providing greater protection against corrosion or loosening. Lower production costs can be achieved by reducing the number of different parts through using multifunctional parts and by introducing simpler assembly techniques.

The earlier our specialists are involved in the construction process, the greater their contribution will be.

PRODUCT & SERVICE PACKAGE

BUSINESS SUPPORT

Our major third strength is business support. Our starting point here is the high availability of our products and the assumption that C parts accounts for 50 percent of the total procurement costs but only for 5 percent of the value of the products.

We have developed and repeatedly implemented, proven logistic systems that can reduce costs for procurement, warehousing, and assembly by 30 percent or more. Such logistic systems have considerable savings potential because only some 15 percent of the total in-place costs are related to the actual fastening element. Numerous companies are not yet using this saving potential.

Currently we can offer our Two-Bin, Kanban Card, Kanban Barcode, Edifact and SmartBin systems.

C-PARTS MANAGEMENT

There is a clear trend worldwide towards procuring C parts from a single source and towards overall C-part management. The single-source competencies acquired through our three service levels make us an experienced and reliable supplier of comprehensive C-part management.
