## About Us

“Let’s advance the way we work together to build a better world” – this is the vision that guides success for ARKANCE and its customers. A subsidiary of the French B2B services group MONNOYEUR, ARKANCE was founded in 2018 to become the leading digitalization partner for the construction and manufacturing sectors.

Fueled by its innovative ‘Partner to Build Smarter’ strategy, ARKANCE combines its own purpose-built Be.Smart software portfolio and expert professional services with solutions from a network of world-class technology partners. With over 1300 employees spread throughout 50 locations worldwide, ARKANCE is a recognized leader in digital transformation across the construction, manufacturing, and infrastructure sectors.

## What we do

At ARKANCE, we drive AEC excellence with cutting-edge digital solutions that enhance efficiency, innovation, and productivity throughout the design, construction, and operation lifecycle. Our portfolio includes top-tier software, technology consulting, and customized services designed to streamline the entire AEC process, from concept to completion.

Partnering with industry leaders, we integrate advanced tools to optimize workflows, reduce project costs, and elevate design and build quality. We’re dedicated to helping AEC professionals navigate industry complexities and transition seamlessly to BIM and digital construction, ensuring smarter project delivery and enhanced collaboration.

## Why ARKANCE

We don’t just provide software—we offer a partnership dedicated to your long-term success. With decades of expertise, a strong local presence, and a global reach, ARKANCE is uniquely positioned to provide personalized support, training, and strategic insights. Our solutions are purpose-built to meet the specific demands of the manufacturing sector, helping businesses stay ahead of the curve, improve productivity, and achieve sustainable growth.

# Our Solutions

Our wide range of **solutions** enable you to undertake and execute projects with ease. We have an inhouse robust team of **technical** and **product solution specialist** who can help support all your project and software technology requirements.

SIP Panels	Precast Concrete	Curtain Walls & Panels	Project	Site Productivity	
Wood Framing	Metal Framing	Excel2R	Pointscene	Site Management	
Smart Browser Free	CLT Panels	Classification System			
and many more...					

## Our BIM Services

### BIMASSIST

- On Project BIM Consultation
- BIM 360 Degree Solution
- BIM Solution for Planning, Designing & Execution
- Tech support on Live Project

### BIMGuru

- BIM Training - Basic & Advance
- Online Project Troubleshooting
- Revit families & Localized templates
- Evaluation, Recruitment & Certification

### BIM Courses

- Training Courses in :-
- BIM for Construction
  - BIM for MEP
  - BIM for Design

## Our Partner Solutions

## Our Esteemed Clients

And many more...
