WELCOME TO LASER MICROMED

Established in 1998, our OEM facility combines cutting-edge technology, expert craftsmanship, and exceptional customer service to bring your ideas to life.

From product design to post-moulding processes, trust us to handle all aspects of injection molding, including mold design ,tooling, materials selection, production and assembly. We have a team of highly skilled engineers leading the charge.

Experience speed, efficiency, and reliability in the creation of your high-quality plastic parts.

CLIENTS SNAPSHOT

We take pride in the strong relationships we've built with **100+ clients** over time including global OEMs across **energy meter sectors, electronics, and consumer retail sectors.**

As a trusted manufacturing partner, we deliver dependable quality and responsive service that helps our clients bring better products to market, faster.

OUR SERVICES AND FEATURES

Injection Moulding

- High-precision plastic injection moulding
- Scalable production with consistent quality and tight tolerances using engineering materials.
- Capability to support diverse materials and product complexities

Tooling & Mould Design

- Custom mould design engineered for durability and optimized cycle times
- In-house tooling support for faster development and maintenance

Assembly & Post-Moulding Operations

- Component assembly, finishing, and value-added processing
- Quality-controlled workflows to ensure ready-to-deliver products

OUR MISSION AND VISION

Our mission is to empower global brands with precision-engineered plastic components that meet the highest standards of performance, safety, and reliability. We are committed to continuous improvement — investing in advanced technologies, developing our people, and maintaining rigorous quality control systems.

By working as a seamless extension of our clients' supply chains, we ensure that every product we manufacture contributes to better healthcare outcomes, stronger industrial performance, and a more efficient world.

At Laser Micromed, we take pride in building value through integrity, technical excellence, and customer-centric service.

We operate under **ISO 9001:2015** and **ISO 14001:2015** certified systems, ensuring robust process control, environmental responsibility, and consistent product performance.

From raw material verification to in-process inspections and final QC, every component is built with precision, traceability, and compliance to international standards.

Our calibrated equipment, trained workforce, and continuous improvement systems work together to deliver reliability you can trust — batch after batch.

OUR SYSTEM INTEGRATION

Technology Integration

Advanced moulding systems and digital quality controls ensure precise, consistent, and efficient production.

Proactive communication

Structured email updates keep clients informed at every stage – clear timelines, proactive follow-ups, zero surprises.

ERP driven operations

ERP-enabled operations provide full traceability, accurate inventory control, and seamless delivery coordination.

Sustainability

We are committed to sustainable manufacturing that reduces waste, conserves resources, and protects the environment.
